## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-38 are drawn to image processing apparatus and method for determining an output mode, classified in class 382, subclass 298.
- II. Claims 39-67 are drawn to image processing apparatus and method for determining a layout, classified in class 382, subclass 286.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as overlaying two images and displaying the layout state. See MPEP § 806.05(d).

### ***Conclusion***

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Lawrence Stahl on Thursday, August 8, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2623

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
